KEY PROJECTS

1. Auto-Closure of Reopened Cases

- Problem: Cases reopened unnecessarily after ID submission, wasting 15+ hrs/week.
- Solution: Collaborated with IT to automate case closure upon valid ID verification.
- Impact: Saved 200+ hours/year and improved team productivity by 25%

2. RAV Macro Translation for Screening

- Problem: Manual translation of names in sanctions screening caused 20% delays.
- Solution: Developed an Excel macro to auto-translate non-English names (e.g., Cyrillic → Latin).
- Impact: Reduced screening time per case from 10 mins → 2 mins, accelerating client SLAs.

3. SOP for Name Mismatch Resolution

- Problem: 15% of alerts are false due to name mismatches (e.g., "Mohammed" vs. "Md.").
- Solution: Redesigned SOP with standardised alias checks and partial-match rules.
- Impact: Cut false alerts by 35%, saving 8 hrs/week in review time.

4. Internal Error-Reduction Initiative

- Problem: High manual errors in transaction monitoring reports.
- Solution: Introduced dual-layer validation and trained 10 analysts on RCA techniques.
- Impact: Errors dropped by 40% within 3 months.
